Art Unit: 3653

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Claims 1-13 are, drawn to \*the subcombination of a label dispenser with a peeling blade \*\*, classified in class \*\*221 \*, subclass \*\*73\*.

Page 2

II. Claims 14-24 are\*\*\*, drawn to \*a subcombination of a label assembly into a magazine\*\*, classified in class \*\*347\*, subclass \*\*101.

2. Inventions of Group I and \*of Group II\*\* are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct

from each other if they are shown to be separately usable. In the instant case, invention

\*\*of Group I\* has separate utility such as a document printer, and the invention of Group

II has separate utility such as a tape or sticker. It is also noted that claims 14, in this

application, were as the claim(15) non-elected in the election filed on 01-28-05 of the

parent application of S.N 10/\*243,888\*\*. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth W Noland whose telephone number is (703) 308-3200. The examiner can normally be reached on Monday-Thursday, each week.

Application/Control Number: 10/630,155
